| Pre-requisites | Intermediate writing skills in English with an aptitude for writing clear and concise content.                                                                                                                                                                                                                                                                                              |                  |                   |                    |             |
| Course Summary | This course offers a thorough overview of technical writing, covering its nature, purposes, and variations. It focuses on introducing different types of technical writing and developing the language skills needed to create them based on industry demands. The course also covers the use of technological innovations to assist with crafting, editing, and collaborating with others. |                  |                   |                    |             |

| V  | <b>OPEN ENDED</b>                            |                                                                                                                                                                                                                                                                                             | <b>12</b> |           |

**Note:** The course is divided into five modules, with four having a total of 14 fixed units and one open-ended module with a variable number of units. There are a total of 48 instructional hours for the fixed modules and 12 hours for the open-ended module. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 14 units from the fixed modules.
