HOW TO TEST YOUR PRESENT VOCABULARY

Once—as a child—you were an expert, an accomplished virtuoso, at learning new words.

Today, by comparison, you are a rank and bumbling amateur.

Does this statement sound insulting?

It may be—but if you are the average adult, it is a statement that is, unfortunately, only too true.

Educational testing indicates that children of ten who have grown up in families in which English is the native language have recognition vocabularies of over twenty thousand words—

And that these same ten-year-olds have been learning new words at a rate of many hundreds a year since the age of four.

In astonishing contrast, studies show that adults who are no longer attending school increase their vocabularies at a pace *slower than twenty-five to fifty words annually.*

How do you assess your own vocabulary?

Is it quantitatively healthy?

Rich in over-all range?

Responsive to any situation in which you may find yourself?

Truly indicative of your intellectual potential?

More important, is it still growing at the same rapid clip as when

you were a child?

Or, as with most adults, has your rate of increase dropped drastically since you left school? And if so, do you now feel that your vocabulary is somewhat limited, your verbal skills not as sharp as you would like them to be?

Let us check it out.

I challenge you to a series of tests that will measure your vocabulary range, as well as your verbal speed and responsiveness.

A TEST OF VOCABULARY RANGE

Here are sixty brief phrases, each containing one italicized word; it is up to you to check the closest definition of each such word. To keep your score valid, refrain, as far as possible, from wild guessing. The key will be found at the end of the test.

1. *disheveled* appearance:
   (a) untidy; (b) fierce, (c) foolish, (d) peculiar, (e) unhappy
2. a *baffling* problem:

A TEST OF VERBAL SPEED

PART 1

This is a timed test.

In no more than three minutes (time yourself, or have someone time you), decide whether the word in column B is the *same* (or *approximately the same*) in meaning as the word in column A; *opposite* (or *approximately opposite*) in meaning; or whether the two words are merely *different.*

Circle S for *same*, O for *opposite*, and D for *different.*

You will not have time to dawdle or think too long, so go as fast as you can.

COLUMN A	COLUMN B			
1. sweet	sour	S	O	D
2. crazy	insane	S	O	D
3. stout	fat	S	O	D
4. big	angry	S	O	D
5. danger	peril	S	O	D
6. help	hinder	S	O	D
7. splendid	magnificent	S	O	D
8. love	hate	S	O	D
9. stand	rise	S	O	D
10. furious	violent	S	O	D
11. tree	apple	S	O	D
12. doubtful	certain	S	O	D
13. handsome	ugly	S	O	D
14. begin	start	S	O	D
15. strange	familiar	S	O	D
16. male	female	S	O	D
17. powerful	weak	S	O	D
18. beyond	under	S	O	D
19. live	die	S	O	D

20. go	get	S	O	D
21. return	replace	S	O	D
22. growl	weep	S	O	D
23. open	close	S	O	D
24. nest	home	S	O	D
25. chair	table	S	O	D
26. want	desire	S	O	D
27. can	container	S	O	D
28. idle	working	S	O	D
29. rich	luxurious	S	O	D
30. building	structure	S	O	D

PART 2

This is also a timed test.

In no more than three minutes (again, time yourself or have someone time you), write down as many *different* words as you can think of that start with the letter *D*.

Do *not* use various forms of a word, such as *do, doing, does, done, doer*, etc.

Space is provided for 125 words. You are not expected to reach that number, but write as fast as you can and see how many blanks you can fill in before your time is up.

KEY: Part 1: 1–O, 2–S, 3–S, 4–D, 5–S, 6–O, 7–S, 8–O, 9–S, 10–S, 11–D, 12–O, 13–O, 14–S, 15–O, 16–O, 17–O, 18–D, 19–O, 20–D, 21–S, 22–D, 23–O, 24–S, 25–D, 26–S, 27–S, 28–O, 29–S, 30–S

Part 2: Any English word starting with *D* is correct unless it is merely another form of a previous word on the list.

Scoring:

PART 1

If you have up to 10 correct answers, credit your score with 25 points.
If you have 11–20 correct answers, credit your score with 50 points.
21–25 correct answers—75 points.
26–30 correct answers—100 points.

Your Score on Part 1:__

PART 2

Up to 30 words:	25 points
31–50 words:	50 points

A TEST OF VERBAL RESPONSIVENESS

PART 1

Write in the blank in column B a word starting with the letter *P* that is the *same*, or *approximately the same*, in meaning as the word given in column A.

Example: look peer_____

Warning: Every answer *must* start with the letter P.

A	B
1. bucket	_____
2. trousers	_____
3. maybe	_____
4. forgive	_____
5. separate	_____
6. likely	_____
7. annoy	_____
8. good-looking	_____
9. picture	_____
10. choose	_____
11. ugly	_____
12. go	_____
13. dish	_____
14. location	_____
15. stone	_____
16. inactive	_____
17. fussy	_____

19. castle	_____
20. gasp	_____
21. fear	_____
22. twosome	_____

23. artist _____
24. sheet _____
25. collection _____

PART 2

Write in the blank in column B a word starting with the letter *G* that is *opposite, approximately opposite*, or *in contrast to* the word given in column A.

Example: stop *go*

Warning: Every answer *must* start with the letter G.

A	B
1. lose	_____
2. midget	_____
3. special	_____
4. lady	_____
5. take	_____
6. moron	_____

VOCABULARY AND SUCCESS

Now you know where you stand. If you are in the below average or average group, you must consider, seriously, whether an inadequate vocabulary may be holding you back. (If you tested out on the above average, excellent, or superior level, you have doubtless already discovered the unique and far-reaching value of a rich vocabulary, and you are eager to add still further to your knowledge of words.)

Let us examine, briefly, some of the evidence that points to the close relationship between vocabulary and personal, professional, and intellectual growth.

The Human Engineering Laboratory found that the *only* common characteristic of successful people in this country is an unusual grasp of the meanings of words. The Laboratory tested the vocabularies of thousands of people in all age groups and in all walks of life—and discovered that those people drawing down the highest salaries made the highest scores. Consider very thoughtfully the explanation that the director of the Laboratory offered for the relationship between vocabulary and success:

"Why do large vocabularies characterize executives and possibly outstanding men and women in other fields? The final answer seems to be that words are the instruments by means of which men and women grasp the thoughts of others and with which they do much of their own thinking. They are the tools of thought."

There is other evidence.

At many universities, groups of freshmen were put into experimental classes for the sole purpose of increasing their knowledge of English words. *These groups did better in their sophomore, junior, and senior years than control groups of similarly endowed students who did not receive such training.*

And still more evidence:

At the University of Illinois, entering students were given a simple twenty-nine-word vocabulary test. The results of this test could be

used, according to Professor William D. Templeman, to make an accurate prediction of future academic success—or lack of success—over the entire four year college course. “If a student has a superior vocabulary,” states Professor Templeman, “it will probably follow that he will do better work academically.”

And finally:

Educational research has discovered that your I.Q. is intimately related to your vocabulary. Take a standard vocabulary test and then an intelligence test—the results in both will be substantially the same.

YOU CAN INCREASE YOUR VOCABULARY

The more extensive your vocabulary, the better your chances for success, other things being equal—success in attaining your educational goals, success in moving ahead in your business or professional career, success in achieving your intellectual potential.

And you *can* increase your vocabulary—faster and easier than you may realize.

You can, in fact, accomplish a tremendous gain in less than two to three months of concentrated effort, even if you do only one session a day—in less time if you do two or more sessions a day.

Furthermore—

You can start improving your vocabulary immediately—and within a few days you can be cruising along at such a rapid rate that there will be an actual change in your thinking, in your ability to express your thoughts, and in your powers of understanding.

Does this sound as if I am promising you the whole world in a neat package with a pretty pink ribbon tied around it? I am. And I am willing to make such an unqualified promise because I have seen what happens to those of my students at New York University and at Rio Hondo College in Whittier, California, who make sincere, methodical efforts to learn more, many more, words.

2

HOW TO START BUILDING YOUR VOCABULARY

When you have finished working with this book, you will no longer be the same person.

You can't be.

If you honestly read every page, if you do every exercise, if you take every test, if you follow every principle, you will go through an intellectual experience that will effect a radical change in you.

For if you systematically increase your vocabulary, you will also sharpen and enrich your thinking; push back your intellectual horizons; build your self-assurance; improve your facility in handling the English language and thereby your ability to express your thoughts effectively; and acquire a deeper understanding of the world in general and of yourself in particular.

Increasing your vocabulary does not mean merely learning the definitions of large numbers of obscure words; it does not mean memorizing scores of unrelated terms. What it means—what it can only mean—is becoming acquainted with the multitudinous and fascinating phenomena of human existence for which words are, obviously, only the verbal descriptions.

Increasing your vocabulary—properly, intelligently, and systematically—means treating yourself to an all-round, liberal

education.

And surely you cannot deny that such an experience will change you intellectually—

Will have a discernible effect on your methods of thinking—on your store of information—on your ability to express your ideas—on your understanding of human problems.

HOW CHILDREN INCREASE THEIR VOCABULARIES

The typical ten-year-old, you will recall, has a recognition vocabulary of over twenty thousand words—and has been learning many hundreds of new words every year since the age of four.

You were once that typical child.

You were once an accomplished virtuoso at vocabulary building.

What was your secret?

Did you spend hours every day poring over a dictionary?

Did you lull yourself to sleep at night with Webster's Unabridged?

Did you keep notebooks full of all the new words you ever heard or read?

Did you immediately look up the meaning of any new word that your parents or older members of your family used?

Such procedures would have struck you as absurd then, as absurd as they would be for you today.

You had a much better, much more effective, and considerably less self-conscious method.

Your method was the essence of simplicity: day in and day out you kept learning; you kept squeezing every possible ounce of learning out of every waking moment; you were an eternal question box, for you had a constant and insatiable desire to know and understand.

HOW ADULTS STOP BUILDING THEIR VOCABULARIES

Then, eventually, at some point in your adult life (unless you are the rare exception), you gradually lost your compulsive drive to discover, to figure out, to understand, to know.

Eventually, therefore, you gradually lost your need to increase your vocabulary—your need to learn the words that could verbalize your new discoveries, your new understanding, your new knowledge.

Roland Gelatt, in a review of Caroline Pratt's book *I Learn from Children*, describes this phenomenon as follows:

> All normal human beings are born with a powerful urge to learn. Almost all of them lose this urge, even before they have reached maturity. It is only the few … who are so constituted that lack of learning becomes a nuisance. This is perhaps the most insidious of human tragedies.

Children are wonders at increasing their vocabularies because of their "powerful urge to learn." They do not learn solely by means of words, but as their knowledge increases, so does their vocabulary—for words are the symbols of ideas and understanding.

(If you are a parent, you perhaps remember that crucial and trying period in which your child constantly asked "Why?" The "Why?" is the child's method of finding out. How many adults that you know go about asking and thinking "Why?" How often do you yourself do it?)

The adults who "lose this urge," who no longer feel that "lack of learning becomes a nuisance," stop building their vocabularies. They stop learning, they stop growing intellectually, they stop changing. When and if such a time comes, then, as Mr. Gelatt so truly says, "This is perhaps the most insidious of human tragedies." But fortunately the process is far from irreversible.

If you have lost the "powerful urge to learn," you can regain it—you can regain your need to discover, to figure out, to understand, to know.

And thus you can start increasing your vocabulary at the same rate as when you were a child.

I am not spouting airy theory. For over thirty-five years I have worked with thousands of adults in my college courses in vocabulary improvement, and I can state as a fact, and without qualification, that:

If you can recapture the "powerful urge to learn" with which you were born, you can go on increasing your vocabulary at a prodigious rate—

No matter what your present age.

WHY AGE MAKES LITTLE DIFFERENCE IN VOCABULARY BUILDING

I repeat, *no matter what your present age.*

You may be laboring under a delusion common to many older people.

You may think that after you pass your twenties you rapidly and inevitably lose your ability to learn.

That is simply not true.

There is no doubt that the years up to eighteen or twenty are the best period for learning. Your own experience no doubt bears that out. And of course *for most people* more learning goes on faster up to the age of eighteen or twenty than ever after, even if they live to be older than Methuselah. (That is why vocabulary increases so rapidly for the first twenty years of life and comparatively at a snail's pace thereafter.)

But (and follow me closely)—

The fact that most learning is accomplished before the age of twenty does not mean that very little learning can be achieved beyond that age.

What *is* done by most people and what *can* be done under proper guidance and motivation are two very, very different things—as scientific experiments have conclusively shown.

Furthermore—

The fact that your learning ability may be best up to age twenty does not mean that it is absolutely useless as soon as your twentieth birthday is passed.

Quite the contrary.

Edward Thorndike, the famous educational psychologist, found in experiments with people of all ages that although the learning curve rises spectacularly up to twenty, it remains steady for at least another five years. After that, ability to learn (according to Professor Thorndike) drops very, very slowly up to the age of thirty-five, and drops a bit more but *still slowly* beyond that age.

And—

Right up to senility the *total* decrease in learning ability after age twenty is never more than 15 per cent!

That does not sound, I submit, as if no one can ever learn anything new after the age of twenty.

Believe me, the old saw that claims you cannot teach an old dog new tricks is a baseless, if popular, superstition.

So I repeat: no matter what your age, you can go on learning efficiently, or start learning once again if perhaps you have stopped.

You can be thirty, or forty, or fifty, or sixty, or seventy—or older.

No matter what your age, you can once again increase your vocabulary at a prodigious rate—providing you recapture the "powerful urge to learn" that is the key to vocabulary improvement.

Not the urge to learn "words"—words are only symbols of ideas.

But the urge to learn facts, theories, concepts, information, knowledge, understanding—call it what you will.

Words are the symbols of knowledge, the keys to accurate thinking. Is it any wonder then that the most successful and intelligent people in this country have the biggest vocabularies?

It was not their large vocabularies that made these people successful and intelligent, but their *knowledge*.

Knowledge, however, is gained largely through words.

In the process of increasing their knowledge, these successful people increased their vocabularies.

Just as children increase *their* vocabulary at a tremendous, phenomenal rate during those years when their knowledge is increasing most rapidly.

Knowledge is chiefly in the form of words, and from now on, in this book, you will be thinking *about*, and thinking *with*, new words and new ideas.

WHAT THIS BOOK CAN DO FOR YOU

This book is designed to get you started building your vocabulary—effectively and at jet-propelled speed—by helping you regain the intellectual atmosphere, the keen, insatiable curiosity, the "powerful urge to learn" of your childhood.

The organization of the book is based on two simple principles: 1) words are the verbal symbols of ideas, and 2) the more ideas you are familiar with, the more words you know.

So, chapter by chapter, we will start with some central idea—personality types, doctors, science, unusual occupations, liars, actions, speech habits, insults, compliments, etc.—and examine ten basic words that express various aspects of the idea. Then, using each word as a springboard, we will explore any others which are related to it in meaning or derivation, so that it is not unlikely that a single chapter may discuss, teach, and test close to one hundred important words.

Always, however, the approach will be from the idea. First there will be a "teaser preview" in which the ideas are briefly hinted at; then a "headline," in which each idea is examined somewhat more closely; next a clear, detailed paragraph or more will analyze the idea in all its ramifications; finally the word itself, which you will meet only after you are completely familiar with the idea.

In the *etymology* (derivation of words) section, you will learn what Greek or Latin root gives the word its unique meaning and what other words contain the same, or related, roots. You will thus be continually working in related fields, and there will never be any possibility of confusion from "too muchness," despite the great number of words taken up and tested in each chapter.

Successful people have superior vocabularies. People who are intellectually alive and successful in the professional or business worlds are accustomed to dealing with ideas, are constantly on the search for new ideas, build their lives and their careers on the ideas they have learned. And it is to readers whose goal is *successful* living (in the broadest meaning of the word *successful*) that this book is

addressed.

A NOTE ON TIME SCHEDULES

From my experience over many years in teaching, I have become a firm believer in setting a goal for all learning and a schedule for reaching that goal.

You will discover that each chapter is divided into approximately equal sessions, and that each session will take from thirty to forty-five minutes of your time, depending on how rapidly or slowly you enjoy working—and bear in mind that everyone has an optimum rate of learning.

For best results, do one or two sessions at a time—spaced studying, with time between sessions so that you can assimilate what you have learned, is far more efficient, far more productive, than gobbling up great amounts in indigestible chunks.

Come back to the book every day, or as close to every day as the circumstances of your life permit.

Find a schedule that is comfortable for you, and then stick to it.

Avoid interrupting your work until you have completed a full session, and always decide, before you stop, *exactly when* you will plan to pick up the book again.

Working at your own comfortable rate, you will likely finish the material in two to three months, give or take a few weeks either way.

However long you take, you will end with a solid feeling of accomplishment, a new understanding of how English words work, and—most important—how to make words work for you.

HOW TO TALK ABOUT PERSONALITY TYPES

(*Sessions 1–3*)

TEASER PREVIEW

What word best describes your personality if you:

- *are interested solely in your own welfare?*
- *constantly talk about yourself?*
- *dedicate your life to helping others?*
- *turn your mind inward?*
- *turn your mind outward?*
- *hate humanity?*
- *hate women?*
- *hate marriage?*
- *lead a lonely, austere existence?*

SESSION 1

Every human being is, in one way or another, unique.

Everyone's personality is determined by a combination of genetic and environmental factors.

Let us examine ten personality types (one of which might by chance be your very own) that result from the way culture, growth, family background, and environment interact with heredity.

And, of course, we begin not with the words, but with the ideas.

IDEAS

1. me first

Your attitude to life is simple, direct, and aboveboard—every decision you make is based on the answer to one question: "What's in it for me?" If your selfishness, greed, and ruthless desire for self-advancement hurt other people, that's too bad. "This is a tough world, pal, dog eat dog and all that, and I, for one, am not going to be left behind!"

An *egoist*

2. the height of conceit

"Now, let's see. Have you heard about all the money I'm making? Did I tell you about my latest amorous conquest? Let me give you my opinion—I know, because I'm an expert at practically everything!" You are boastful to the point of being obnoxious—you have only one string to your conversational violin, namely, *yourself;* and on it you play a number of monotonous variations: what *you* think, what *you* have done, how good *you* are, how *you* would solve the problems of

the world, etc. ad nauseam.

An *egotist*

3. let me help you

You have discovered the secret of true happiness—concerning yourself with the welfare of others. Never mind your own interests, how's the next fellow getting along?

An *altruist*

4. leave me alone

Like a biochemist studying a colony of bacteria under the microscope, you minutely examine your every thought, feeling, and action. Probing, futile questions like "What do other people think of me?", "How do I look?", and "Maybe I shouldn't have said that?" are your constant nagging companions, for you are unable to realize that other people do not spend as much time and energy analyzing you as you think.

You may seem unsocial, yet your greatest desire is to be liked and accepted. You may be shy and quiet, you are often moody and unhappy, and you prefer solitude or at most the company of one person to a crowd. You have an aptitude for creative work and are uncomfortable engaging in activities that require cooperation with other people. You may even be a genius, or eventually turn into one.

An *introvert*

5. let's do it together

You would be great as a teacher, counselor, administrator, insurance agent. You can always become interested—sincerely, vitally interested—in other people's problems. You're the life of the party,

because you never worry about the effect of your actions, never inhibit yourself with doubts about dignity or propriety. You are usually happy, generally full of high spirits; you love to be with people—lots of people. Your thoughts, your interests, your whole personality are turned outward.

An *extrovert*

6. neither extreme

You have both introverted and extroverted tendencies—at different times and on different occasions. Your interests are turned, in about equal proportions, both inward and outward. Indeed, you're quite normal—in the sense that your personality is like that of most people.

An *ambivert*

7. people are no damn good

Cynical, embittered, suspicious, you hate everyone. (Especially, but never to be admitted, *yourself?*) The perfectibility of the human race? "Nonsense! No way!" The stupidity, the meanness, and the crookedness of most mortals ("Most? Probably all!")—that is your favorite theme.

A *misanthrope*

8. women are no damn good

Sometime in your dim past, you were crossed, scorned, or deeply wounded by a woman (a mother, or mother figure, perhaps?). So now you have a carefully constructed defense against further hurt—you hate *all* women.

A *misogynist*

9. “marriage is an institution—and who wants to live in an institution?”

You will not make the ultimate *legal* commitment. Members of the opposite sex are great as lovers, roommates, apartment- or house-sharers, but *not* as lawfully wedded spouses. The ties that bind are too binding for you. You may possibly believe, and possibly, for yourself, be right, that a commitment is deeper and more meaningful if freedom is available without judicial proceedings.

A *misogamist*

10. “… that the flesh is heir to …”

Self-denial, austerity, lonely contemplation—these are the characteristics of the good life, so you claim. The simplest food and the least amount of it that will keep body and soul together, combined with abstinence from fleshly, earthly pleasures, will eventually lead to spiritual perfection—that is your philosophy.

An *ascetic*

USING THE WORDS

You have been introduced to ten valuable words—but in each case, as you have noticed, you have first considered the ideas that these words represent. Now *say* the words—each one is respelled phonetically so that you will be sure to pronounce it correctly.[1]

Say each word aloud. This is the first important step to complete mastery. As you hear a word in your own voice, think of its meaning. Are you quite clear about it? If not, reinforce your learning by rereading the explanatory paragraph or paragraphs.

Can you pronounce the words?

1. *egoist*	EE′-gō-ist
2. *egotist*	EE′-gō-tist
3. *altruist*	AL′-trōō-ist
4. *introvert*	IN′-trə-vurt′
5. *extrovert*	EKS′-trə-vurt′
6. *ambivert*	AM′-bə-vurt′
7. *misanthrope*	MIS′-ən-thrōp′
8. *misogynist*	mə-SOJ′-ə-nist
9. *misogamist*	mə-SOG′-ə-mist
10. *ascetic*	ə-SET′-ik

Can you work with the words?

You have taken two long steps toward mastery of the expressive words in this chapter—you have thought about the ideas behind them, and you have said them aloud.

For your third step, match each personality with the appropriate characteristic, action, or attitude.

1. egoist	a. turns thoughts inward
2. egotist	b. hates marriage
3. altruist	c. talks about accomplishments
4. introvert	d. hates people
5. extrovert	e. does not pursue pleasures of the flesh
6. ambivert	f. is interested in the welfare of others
7. misanthrope	g. believes in self-advancement
8. misogynist	h. turns thoughts both inward and outward
9. misogamist	i. hates women
10. ascetic	j. turns thoughts outward

KEY: 1–g, 2–c, 3–f, 4–a, 5–j, 6–h, 7–d, 8–i, 9–b, 10–e

Do you understand the words?

Now that you are becoming more and more involved in these ten words, find out if they can make an immediate appeal to your understanding. Here are ten questions—can you indicate, quickly, and without reference to any previous definitions, whether the correct answer to each of these questions is *yes* or *no?*

1. Is an *egoist* selfish?
   YES NO
2. Is modesty one of the characteristics of the *egotist?*
   YES NO
3. Is an *altruist* selfish?
   YES NO
4. Does an *introvert* pay much attention to himself?
   YES NO
5. Does an *extrovert* prefer solitude to companionship?
   YES NO
6. Are most normal people *ambiverts?*
   YES NO
7. Does a *misanthrope* like people?
   YES NO
8. Does a *misogynist* enjoy the company of women?
   YES NO
9. Does an *ascetic* lead a life of luxury?
   YES NO
10. Does a *misogamist* try to avoid marriage?
    YES NO

KEY: 1–yes, 2–no, 3–no, 4–yes, 5–no, 6–yes, 7– no, 8–no, 9–no, 10–yes

Can you recall the words?

You have thus far reinforced your learning by saying the words aloud, by matching them to their definitions, and by responding to meaning when they were used in context.

Can you recall each word, now, without further reference to previous material? And can you spell it correctly?

1. Who lives a lonely, austere life?
   1. A_____
2. Whose interests are turned outward?
   2. E_____
3. Who is supremely selfish?
   3. E_____
4. Who hates people?
   4. M_____
5. Whose interests are turned both inward and outward?
   5. A_____
6. Who is incredibly conceited?
   6. E_____
7. Who is more interested in the welfare of others than in his own?
   7. A_____
8. Who hates women?
   8. M_____
9. Whose interests are turned inward?
   9. I_____
10. Who hates marriage?
    10. M_____

KEY: 1–ascetic, 2–extrovert, 3–egoist, 4–misanthrope, 5–ambivert, 6–egotist, 7–altruist, 8–misogynist, 9–introvert, 10–misogamist

(*End of Session 1*)

SESSION 2

ORIGINS AND RELATED WORDS

Every word in the English language has a history—and these ten are no exception. In this section you will learn a good deal more about the words you have been working with; in addition, you will make excursions into many other words allied either in meaning, form, or history to our basic ten.

1. the ego

Egoist and *egotist* are built on the same Latin root—the pronoun *ego*, meaning *I. I* is the greatest concern in the *egoist's* mind, the most overused word in the *egotist's* vocabulary. (Keep the words differentiated in your own mind by thinking of the *t* in *talk*, and the additional *t* in *egotist.*) *Ego* itself has been taken over from Latin as an important English word and is commonly used to denote one's concept of oneself, as in, "What do you think your constant criticisms do to my *ego?*" *Ego* has also a special meaning in psychology—but for the moment you have enough problems without going into *that.*

If you are an *egocentric* (ee′-gō-SEN′-trik), you consider yourself the *center* of the universe—you are an extreme form of the *egoist.* And if you are an *egomaniac* (ee′-gō-MAY′-nee-ak), you carry *egoism* to such an extreme that your needs, desires, and interests have become a morbid obsession, a *mania.* The *egoist* or *egotist* is obnoxious, the *egocentric* is intolerable, and the *egomaniac* is dangerous and slightly mad.

Egocentric is both a noun ("What an *egocentric* her new roommate is!") and an adjective ("He is the most *egocentric* person I have ever met!").

To derive the adjective form of *egomaniac*, add *-al*, a common

adjective suffix. Say the adjective aloud:

egomaniacal ee′-gō-mə-NĪ′-ə-kəl

2. others

In Latin, the word for *other* is *alter*, and a number of valuable English words are built on this root.

Altruism (AL′-tro͞o-iz-əm), the philosophy practiced by *altruists*, comes from one of the variant spellings of Latin *alter*, other. *Altruistic* (al-tro͞o-IS′-tik) actions look toward the benefit of *others.* If you *alternate* (AWL′-tər-nayt′), you skip one and take the *other*, so to speak, as when you play golf on *alternate* (AWL′-tər-nət) Saturdays.

An *alternate* (AWL′-tər-nət) in a debate, contest, or convention is the *other* person who will take over if the original choice is unable to attend. And if you have no *alternative* (awl-TUR′-nə-tiv), you have no *other* choice.

You see how easy it is to understand the meanings of these words once you realize that they all come from the same source. And keeping in mind that *alter* means *other*, you can quickly understand words like *alter ego, altercation*, and *alteration.*

An *alteration* (awl′-tə-RAY′-shən) is of course a change—a making into something *other.* When you *alter* (AWL′-tər) your plans, you make *other* plans.

An *altercation* (awl′-tər-KAY′-shən) is a verbal dispute. When you have an *altercation* with someone, you have a violent disagreement, a "fight" with words. And why? Because you have *other* ideas, plans, or opinions than those of the person on the *other* side of the argument. *Altercation*, by the way, is stronger than *quarrel* or *dispute*—the sentiment is more heated, the disagreement is likely to be angry or even hot-tempered, there may be recourse, if the disputants are human, to profanity or obscenity. You have *altercations*, in short, over pretty important issues, and the word implies that you get quite excited.

Alter ego (AWL′-tər EE′-gō), which combines *alter*, other, with *ego*,

I, self, generally refers to someone with whom you are so close that you both do the same things, think alike, react similarly, and are, in temperament, almost mirror images of each other. Any such friend is your *other I*, your *other self*, your *alter ego.*

USING THE WORDS

Can you pronounce the words?

Digging a little into the derivation of three of our basic words, *egoist, egotist*, and *altruist*, has put us in touch with two important Latin roots, *ego,* I, self, and *alter*, other, and has made it possible for us to explore, with little difficulty, many other words derived from these roots. Pause now, for a moment, to digest these new acquisitions, and to say them *aloud.*

1. *ego*	EE′-gō
2. *egocentric*	ee-gō-SEN′-trik
3. *egomaniac*	ee-gō-MAY′-nee-ak
4. *egomaniacal*	ee′-gō-mə-NĪ′-ə-kəl
5. *altruism*	AL′-trōō-iz-əm
6. *altruistic*	al-trōō-IS′-tik
7. to *alternate* (*v.*)	AWL′-tər-nayt′
8. *alternate* (*adj.* or *noun*)	AWL′-tər-nət
9. *alternative*	awl-TUR′-nə-tiv
10. *alteration*	awl′-tər-AY′-shən
11. to *alter*	AWL′-tər
12. *altercation*	awl′-tər-KAY′-shən
13. *alter ego*	AWL′-tər EE′-gō

Can you work with the words? (I)

You have seen how these thirteen words derive from the two Latin roots *ego*, I, self, and *alter*, other, and you have pronounced them

aloud and thereby begun to make them part of your active vocabulary.

Are you ready to match definitions to words?

1. ego	a. one who is excessively fixated on his own desires, needs, etc.
2. egocentric	b. to change
3. altruism	c. argument
4. to alternate	d. one's concept of oneself
5. to alter	e. to take one, skip one, etc.
6. altercation	f. philosophy of putting another's welfare above one's own

KEY: 1–d, 2–a, 3–f, 4–e, 5–b, 6–c

Can you work with the words? (II)

1. egomaniacal	a. a change
2. altruistic	b. other possible
3. alternative	c. interested in the welfare of others
4. alteration	d. one's other self
5. alter ego	e. a choice
6. alternate (*adj.*)	f. morbidly, obsessively wrapped up in oneself

KEY: 1–f, 2–c, 3–e, 4–a, 5–d, 6–b

Do you understand the words?

If you have begun to understand these thirteen words, you will be able to respond to the following questions.

1. Is rejection usually a blow to one's *ego?*
   YES NO
2. Are *egocentric* people easy to get along with?
   YES NO
3. Does an *egomaniac* have a normal personality?
   YES NO
4. Are *egomaniacal* tendencies a sign of maturity?
   YES NO
5. Is *altruism* a characteristic of selfish people?
   YES NO
6. Are *altruistic* tendencies common to egoists?
   YES NO
7. Is an *alternate* plan necessarily inferior?
   YES NO
8. Does an *alternative* allow you some freedom of choice?
   YES NO
9. Does *alteration* imply keeping things the same?
   YES NO
10. Do excitable people often engage in *altercations?*
    YES NO
11. Is your *alter ego* usually quite similar to yourself?
    YES NO

KEY: 1–yes, 2–no, 3–no, 4–no, 5–no, 6–no, 7–no, 8–yes, 9–no, 10–yes, 11–yes

Can you recall the words?

Have you learned these words so well that you can summon each one from your mind when a brief definition is offered? Review first if necessary; then, without further reference to previous pages, write the correct word in each blank. Make sure to check your spelling when you refer to the Key.

1. one's other self
   1. A_____
2. to change
   2. A_____
3. a heated dispute
   3. A_____
4. excessively, morbidly obsessed with one's own needs, desires, or ambitions
   4. E_____
5. unselfish; more interested in the welfare of others than in one's own
   5. A_____
6. utterly involved with oneself; self-centered
   6. E_____
7. a choice
   7. A_____
8. one who substitutes for another
   8. A_____

KEY: 1–alter ego, 2–alter, 3–altercation, 4–egomaniacal, 5–altruistic, 6–egocentric, 7–alternative, 8–alternate

(*End of Session 2*)

SESSION 3

ORIGINS AND RELATED WORDS

1. depends how you turn

Introvert, extrovert, and *ambivert* are built on the Latin verb *verto*, to turn. If your thoughts are constantly turned inward (*intro-*), you are an *introvert;* outward (*extro-*), an *extrovert;* and in both directions (*ambi-*), an *ambivert.* The prefix *ambi-*, both, is also found in *ambidextrous* (am′-bə-DEKS′-trəs), *able to use both hands with equal skill.* The noun is *ambidexterity* (am′-bə-deks-TAIR′-ə-tee).

Dexterous (DEKS′-trƏs) means *skillful*, the noun *dexterity* (deks-TAIR ′-ə-tee) is *skill.* The ending *-ous* is a common adjective suffix (*famous, dangerous, perilous*, etc.); *-ity* is a common noun suffix (*vanity, quality, simplicity*, etc.).

(Spelling caution: Note that the letter following the *t-* in *ambidextrous* is *-r*, but that in dexterous the next letter is *-e.*)

Dexter is actually the Latin word for *right hand*—in the *ambidextrous* person, both hands are *right hands*, so to speak.

The right hand is traditionally the more skillful one; it is only within recent decades that we have come to accept that “lefties” or “southpaws” are just as normal as anyone else—and the term *left-handed* is still used as a synonym of *awkward.*

The Latin word for the *left hand* is *sinister.* This same word, in English, means *threatening, evil*, or *dangerous*, a further commentary on our early suspiciousness of left-handed persons. There may still be some parents who insist on forcing left-handed children to change (though left-handedness is inherited, and as much an integral part of its possessor as eye color or nose shape), with various unfortunate results to the child—sometimes stuttering or an inability to read with normal skill.

The French word for the *left hand* is *gauche*, and, as you would suspect, when we took this word over into English we invested it with an uncomplimentary meaning. Call someone *gauche* (GŌSH) and you imply clumsiness, generally social rather than physical. (We're right back to our age-old misconception that left-handed people are less skillful than right-handed ones.) A *gauche* remark is tactless; a *gauche* offer of sympathy is so bumbling as to be embarrassing; *gaucherie* (GŌ′-shə-ree) is an awkward, clumsy, tactless, embarrassing way of saying things or of handling situations. The *gauche* person is totally without finesse.

And the French word for the *right hand* is *droit*, which we have used in building our English word *adroit* (ə-DROYT′). Needless to say, *adroit*, like *dexterous*, means *skillful*, but especially in the exercise of the mental facilities. Like *gauche, adroit*, or its noun *adroitness*, usually is used figuratively. The *adroit* person is quickwitted, can get out of difficult spots cleverly, can handle situations ingeniously. *Adroitness* is, then, quite the opposite of *gaucherie.*

2. love, hate, and marriage

Misanthrope, misogynist, and *misogamist* are built on the Greek root *misein*, to hate. The *misanthrope* hates mankind (Greek *anthropos*, mankind); the *misogynist* hates women (Greek *gyne*, woman); the *misogamist* hates marriage (Greek *gamos*, marriage).

Anthropos, mankind, is also found in *anthropology* (an-thrə-POL′-ə-jee), the study of the development of the human race; and in *philanthropist* (fə-LAN′-thrə-pist), one who loves mankind and shows such love by making substantial financial contributions to charitable organizations or by donating time and energy to helping those in need.

The root *gyne*, woman, is also found in *gynecologist* (gīn-ə-KOL′-ə-jist *or* jīn-KOL′-ə-jist), the medical specialist who treats female disorders. And the root *gamos*, marriage, occurs also in *monogamy* (mə-NOG′-ə-mee), *bigamy* (BIG′-ə-mee), and *polygamy* (pə-LIG′-ə-mee).

(As we will discover later, *monos* means *one, bi-* means *two, polys*

means *many*.)

So *monogamy* is the custom of only *one* marriage (at a time).

Bigamy, by etymology, is *two* marriages—in actuality, the unlawful act of contracting another marriage without divorcing one's current legal spouse.

And *polygamy*, by derivation *many* marriages, and therefore etymologically denoting plural marriage for either males *or* females, in current usage generally refers to the custom practiced in earlier times by the Mormons, and before them by King Solomon, in which the man has as many wives as he can afford financially and/or emotionally. The correct, but rarely used, term for this custom is *polygyny* (pə-LIJ′-ə-nee)—*polys*, many, plus *gyne*, woman.

What if a woman has two or more husbands, a form of marriage practiced in the Himalaya Mountains of Tibet? That custom is called *polyandry* (pol-ee-AN′-dree), from *polys* plus Greek *andros*, male.

3. making friends with suffixes

English words have various forms, using certain suffixes for nouns referring to persons, other suffixes for practices, attitudes, philosophies, etc, and still others for adjectives.

Consider:

Person	*Practice, etc.*	*Adjective*
1. misanthrope *or* misanthropist	misanthropy	misanthropic
2. misogynist	misogyny	misogynous *or* misogynistic
3. gynecologist	gynecology	gynecological
4. monogamist	monogamy	monogamous
5. bigamist	bigamy	bigamous
6. polygamist	polygamy	polygamous
7. polygynist	polygyny	polygynous
8. polyandrist	polyandry	polyandrous
9. philanthropist	philanthropy	philanthropic

10. anthropologist anthropology anthropological

You will note, then, that *-ist* is a common suffix for a person; *-y* for a practice, attitude, etc.; and *-ic* or *-ous* for an adjective.

4. living alone and liking it

Ascetic is from the Greek word *asketes,* monk or hermit.

A monk lives a lonely life—not for him the pleasures of the fleshpots, the laughter and merriment of convivial gatherings, the dissipation of high living. Rather, days of contemplation, study, and rough toil, nights on a hard bed in a simple cell, and the kind of self-denial that leads to a purification of the soul.

That person is an *ascetic* who leads an existence, voluntarily of course, that compares in austerity, simplicity, and rigorous hardship with the life of a monk.

The practice is *asceticism* (ə-SET′-ə-siz-əm), the adjective *ascetic.*

REVIEW OF ETYMOLOGY

Notice how efficiently you can master words by understanding their etymological structure. Stop for a moment to review the roots, prefixes, and suffixes you have studied. Can you recall a word we have discussed in this chapter that is built on the indicated prefix, root, or suffix?

PREFIX, ROOT, SUFFIX	MEANING	EXAMPLE
1. *ego*	self, I	_____
2. *alter*	other	_____
3. *intro-*	inside	_____

(*Answers in Chapter 18.*)

STICK TO YOUR TIME SCHEDULE!

In three sessions, you have become acquainted with scores of new, vital, exciting words. You understand the ideas behind these words, their various forms and spellings, their pronunciation, their derivation, how they can be used, and exactly what they mean. I do not wish to press a point unduly, but it is possible that you have learned more new words in the short time it took you to cover this chapter than the average adult learns in an entire year. This realization should make you feel both gratified and excited.

Funny thing about time. Aside from the fact that we all, rich or

poor, sick or well, have the same amount of time, exactly twenty-four hours every day (that is looking at time from a static point of view), it is also true that we can always find time for the things we enjoy doing, almost never for the things we find unpleasant (and that is looking at time from the dynamic point of view). I am not merely being philosophical—I am sure you will agree with this concept if you give it a little thought.

If you have enjoyed learning new words, accepting new challenges, gaining new understanding, and discovering the thrill of successful accomplishment, then make sure to stay with the time schedule you have set up for yourself.

A crucial factor in successful, ongoing learning is routine.

Develop a comfortable time routine, persevere against all distractions, and you will learn anything you sincerely want to learn.

So, to give yourself an edge, write here the day and hour you plan to return to your work:

DAY: _____
DATE: _____
TIME: _____

TEST YOUR GRAMMAR

How good is your English? Have you ever said *me* and then wondered if it shouldn't have been *I*—or vice versa? Do you sometimes get a little confused about *lay* and *lie* or *who* and *whom?* Perhaps you are often a little less than certain about the distinction between *effect* and *affect, principal* and *principle, childish* and *childlike?*

Here is a series of quick tests that will show you how skillful you are in using the right word in the right place, that will give you a reliable indication of how your language ability compares with the average.

TEST I—EASY

If your English is every bit as good as average, you will have no difficulty making a proper choice in at least eight of the following ten sentences.

1. There is a beautiful moon out tonight and Estelle and I are going for a stroll—would you like to come along with (she and I, her and me?)
2. Your husband doesn't believe that you are older than (I, me).
3. Maybe we're not as rich as (they, them), but I bet we're a lot happier.
4. Does your child still (lay, lie) down for a nap after lunch?
5. When we saw Mary openly flirting with Nellie's husband, we (could, couldn't) hardly believe our eyes.
6. You should (of, have) put more vermouth into the martini.
7. Does your company (leave, let) you have as long a lunch break as you would like?
8. Harriet feels that her (brothers-in-law, brother-in-laws) are impossible to get along with.
9. "What (kind of, kind of a) car are you looking for?" asked the salesman.
10. Mrs. White was delighted that the Fennells had invited John and (she, her) to their party.

Is your English up to par? HERE ARE THE CORRECT ANSWERS

1–her and me, 2–I, 3-they, 4–lie, 5–could, 6–have, 7–let, 8–brothers-in-law, 9–kind of, 10–her

TEST II—HARDER

Choose correctly in at least seven of the following problems to consider that your skill is distinctly above average—get all ten right to conclude that you rarely, if ever, make an error in grammar.

1. What (effect, affect) has the new administration's policies had on investor confidence?
2. A feeling of one's worth is one of the (principle, principal) goals of psychological therapy.
3. There's no sense (in, of) carrying on that way.
4. I can't remember (who, whom) it was.
5. The infant (lay, laid) quietly sucking its thumb.
6. No one but (she, her) ever made a perfect score on the test.
7. In the early days of frontier history, horse thieves were (hanged, hung).
8. Neither of your responses (are, is) satisfactory.
9. Either of these two small cars, if properly maintained, (is, are) sure to give over thirty miles per gallon in highway driving.
10. Tell (whoever, whomever) is waiting to come in.

Is your English above average? HERE ARE THE CORRECT ANSWERS

1–effect, 2–principal, 3–in, 4–who, 5–lay, 6–her, 7–hanged, 8–is, 9–is, 10–whoever

TEST III—HARDEST

Now you can discover how close you are to being an expert in English. The next ten sentences are no cinch—you will be acquitting yourself creditably if you check the correct word five times out of ten. And you have every right to consider yourself an expert if you get nine or ten right.

1. We have just interviewed an applicant (who, whom) the committee believes is best qualified for the position.
2. She is one of those gifted writers who (turns, turn) out one best seller after another.
3. Don't sound so (incredulous, incredible); what I am saying is absolutely true.
4. We were totally (disinterested, uninterested) in the offer.
5. This recipe calls for two (cupsful, cupfuls) of sugar.
6. Are you trying to (infer, imply) by those words that he is not to be trusted?
7. We thought the actress to be (she, her), but we weren't sure.
8. Was it (she, her) you were talking about?
9. Your criteria (is, are) not valid.
10. "It is I who (is, am) the only friend you've got," she told him pointedly.

Are you an expert? HERE ARE THE CORRECT ANSWERS

1–who, 2–turn, 3–incredulous, 4–uninterested, 5–cupfuls, 6–imply, 7–her, 8–she, 9–are, 10–am

ANSWERS

1. (*d*) : The statement mentions that morning walks improve health. But this does not mean that all healthy people go for morning walks. So, I does not follow. Also, nothing is mentioned about evening walks in the statement. So, II does not follow.

2. (*e*) : It is mentioned in the statement that one who considers price and quality before buying a product should buy the product of company X. So, both I and II follow.

3. (*d*) : Clearly, both I and II do not follow from the given statement.

4. (*a*) : It is mentioned in the statement that a neurotic is a person who behaves stupidly. So, I follows. The behaviour of normal persons cannot be deduced from the given statement. So, II does not follow.

5. (*d*) : The availability of vegetables is not mentioned in the given statement. So, I does not follow. Also, II is not directly related to the statement and so it also does not follow.

6. (*a*) : It is mentioned in the statement that India's economy depends mainly on forests. This means that forests should be preserved. So, I follows. But, that only preservation of forests can improve the economy, cannot be said. So, II does not follow.

7. (*e*) : The statement mentions that the world for a man is as he makes it himself. So, some people might find it good and some quite bad. Thus, both I and II follow.

8. (*e*) : Since both I and II provide suitable explanations to the given statement, so both follow.

9. (*b*) : Clearly, the statement talks of company X only and no other company. So, I does not follow. Also, it is mentioned that one can take a good shot even in bad weather conditions with a camera of company X. So, II follows.

10. (*d*) : The statement mentions the problem of increased migration of children to cities. But the ways to deal with the problem cannot be deduced from it. So, neither I nor II follows.

11. (*b*) : The statement talks of jade plants only and not 'all plants with thick leaves'. So. I does not follow. Also, since jade plants require little water, so they can be grown in place where water is not in abundance. So, II follows.

12. (*e*) : The statement mentions that after the amendment, no child below 14 years will be engaged in hazardous employment. This means that before the amendment, the practice of employing children below 14 years was in vogue. This in turn means that employers will have to abide by the amendment. So, both I and II follow.
