

QP Code: D134338		Total Pages: 1	Name:
		Register No.	
THIRD SEMESTER UG DEGREE EXAMINATION, NOVEMBER 2025			
(CUFYUGP)			
CSC3MN206 - PROGRAMMING USING PYTHON			
2024 Admission onwards			
Maximum Time: 2 Hours		Maximum Marks: 70	
Section A			
All Questions can be answered. Each Question carries 3 marks (Ceiling: 24 Marks)			
1	Define problem analysis with an example.		
2	What is the importance of flowcharts in problem solving?		
3	List any four standard data types in Python with examples.		
4	Explain the concept of Boolean expressions with example.		
5	What are NumPy arrays?		
6	Distinguish between scalar and vectorized operations in NumPy.		
7	Define user-defined function with an example.		
8	What are tuples in Python?		
9	Write the syntax of a while loop with an example.		
10	What is the purpose of type conversion in Python?		
Section B			
All Questions can be answered. Each Question carries 6 marks (Ceiling: 36 Marks)			
11	Explain top-down design with the help of a suitable example.		
12	Describe different types of operators in Python with examples.		
13	Explain broadcasting in NumPy with an example.		
14	Discuss various string operations in Python with examples.		
15	Explain recursion with an example program.		
16	Write short notes on structured arrays in NumPy.		
17	Explain the role of local variables and encapsulation in Python functions.		
18	Compare lists and tuples with suitable examples.		
Section C			
Answer any ONE. Each Question carries 10 marks (1x10=10 Marks)			
19	Explain problem-solving strategies using algorithms and flowcharts with suitable examples.		
20	Write and explain a Python program using functions to find the largest among three numbers.
